Re: Application number 10/759,090
Filing Date: 01/20/2004
Name of Applicant: Tom Kusic
Invention Title: Aircraft Spiralling Mechanism B

Attention: Examiner Mr. Timothy D. Collins

Thank you for your correspondence with the mailing date
03/31/2006.

In order to overcome the rejection of the claims identified in paragraph 2 of your correspondence, I have decided to disclaim claims 6, 7, 8, 9, 12 and 13 of U.S. Patent No. 6764044. On June 22, 2006, I faxed a "disclaimer in patent under 37 CFR 1.321(a)" form to the USPTO, disclaiming claims 6, 7, 8, 9, 12 and 13 of U.S. Patent No. 6764044, which was accompanied with payment of \$65.

Following our discussion regarding the word "symmetry" as used in the application numbered 10/762,267, I have decided to cancel claims 4, 5, 6, 21, 22, 23, and 24 in application numbered 10/759,090, and amended claims 29 and 30 so that the amended claims are now dependent on claims 1 to 3, 7 to 20, and 25 to 28. A replacement set of pages containing the claims now remaining in the application are attached. New matter has not been added.

Yours sincerely,

T. Kusic.

Entry Approved. 20/6/06
